

## **Vutek 2360 8C Ultra Vu**

**This eight-colour piezo drop on demand machine uses 3M inks to provide the highest quality image reproduction with print resolution up to 720 dpi.**

Used in conjunction with 3M consumables the 3M Scotchprint warranty is available across a wide spread of applications including vehicle livery and floor graphics. The use of six colours allows the use of light cyan and light magenta, which create smooth, highlights to mid tone transitions for improved colour quality, higher apparent resolution and a wider colour gamut.
